Analyzes Rhythmic and Timing Accuracy

Displays realtime, records all history & scores your accuracy, too!

A fun and easy way for percussionists of all skill levels to build solid rhythmic fundamentals, flawless timing and a great feel!

BEATNIK RA1200P MODEL

BEATNIK™
- RHYTHMIC ANALYZERS -

BEATNIK P-Series:

- Accurate to 512th Note
- Four Skill Levels
- Scores Your Accuracy
- Stores Unlimited History
- Graphic Display
- Touch Sensitive Input
- Advanced Polymer Pad
- Click Depth™ Control
- Tap Start Control
- Tap Set Control
- Lighted Buttons
- Metronome 25-250bpm
- Headphones Included
- 6 AA Batteries included
- Optional AC Adapter

RA1200P Features:

- Five Built-in Analyzers
- Four Data Views
- Backlit Display

RA800P Features:

- Two Built-in Analyzers
- Two Data Views
- Reflective Display

Analyzer	Vol	Accuracy	Tempo
Groove	060 - 058	±10 bpm	8th
Dynamics	150 - 145	72 %	32nd
Subdivisions	100 - 115	45 %	5 over 1
Tracking	100 - 115	45 %	16th
Phrase	060 - 064	75 %	7 over 1

BEATNIK™ RHYTHMIC ANALYZERS

RA1200P
RA800P

Beatnik™ Rhythmic Analyzers for Percussion from OnBoard Research will help you improve your rhythmic accuracy in ways never before possible. Both the RA1200P and RA800P models provide the immediate timing feedback necessary to learn to play the most complex figures with perfect accuracy and a great feel. Whether you're an experienced player who wants some fine-tuning or a promising new talent interested in developing solid rhythmic fundamentals, Beatnik answers the call.

Each one of Beatnik's multiple built-in analyzers evaluate a unique aspect of your timing and rhythmic skills, and Beatnik's multiple views of the timing data instantly reveal technical strengths and weaknesses to help you immediately analyze your technical precision and speed up progress toward rhythmic perfection.

After you set the desired rhythm on the built-in metronome, simply start the playback and strike the touch sensitive practice pad. Beatnik's large, graphic display shows a visual representation of each stroke in real time and records every stroke for a view of history, showing with accuracy to the nearest 512th note where your strokes occurred in relation to the actual beat!

There has never before been anything like Beatnik. If you have ever wanted to evaluate and improve your current rhythmic and timing performance skills, spend some time with a Beatnik Rhythmic Analyzer.

MULTIPLE BUILT IN ACCURACY ANALYZERS

The multiple revolutionary analyzers built into Beatnik each measure different aspects of your rhythmic and timing accuracy.

MULTIPLE "VIEWS" ON THE STROKE TIMING DATA

Multiple detailed "views" of the stroke data instantly reveal insight into your dynamics, rhythm and timing control.

RECORDS AND DISPLAYS STROKE HISTORY

Beatnik records the timing of every stroke for review summaries of your stroke timing data.

TOUCH SENSITIVE PRACTICE PAD

Beatnik's touch-sensitive practice pad is formed of advanced silicon polymers that provide a highly responsive and realistic rebound action.

TRACKS SUBDIVISION CHANGES "ON THE FLY"

Beatnik RA1200P's Tracking analyzer will help you improve transitions between changing subdivisions while maintaining consistent rhythm and correct timing. You can switch freely between any subdivision and Beatnik will track your playing, display the timing and the score in realtime, and record everything for a summary review when you can examine the timing history of each subdivision.

COMPLEX PHRASE PERFORMANCE ANALYSIS

Beatnik RA1200P's Phrase analyzer will help you improve your performance accuracy of complicated and more extended rhythmic phrases. You can set up a rhythmic phrase up to eight beats in length, incorporating any combination of notes and rests. Of course, Beatnik records every stroke so you can review the phrase performance history note by note.

WORLD'S MOST ADVANCED METRONOME

Beatnik's internal metronome is the most advanced in the world. It can test you on any permutation for every note from quarter note to thirty-second notes:

- Quarter Note
- Eighth Notes
- Eighth Note Triplets
- Sixteenth Notes
- 5 over 1
- Sixteenth Note Triplets
- 7 over 1
- Thirty Second Notes

SKILL LEVEL ADJUSTMENT AND SCORING

Select between four skill levels to allow a wider margin of tolerance for timing accuracy and scoring.

- Expert: within one 512th note
- High: within three 512th notes
- Medium: within five 512th notes
- Low: within seven 512th notes

TAP TEMPO AND TAP START

- Tap Tempo sets the tempo based on strokes, allowing you to manually start a practice session later.
- The Tap Start uses count-off beats to set the tempo and automatically start a practice session "on the fly."

SPECIFICATIONS

Timing Precision	Accurate to nearest 512th note
Metronome Range	25 -250 beats per minute
Battery Type	AA size, 3-volt, 6 required, incl.
Power Supply	9 volts
Headphone Jack	3.5mm, headphones included
Weight	2.5 pounds (1.33kg)
Dimensions (inches)	9.75" x 13" x 2.75"x 2.75"
(millimeters)	76mm x 330mm x 69mm
Stand Mount Size	8 millimeter screw, stand not incl.

ONE YEAR LIMITED WARRANTY
